Below you will find an overview of the expected costs for your treatment in our Hospital Group. Please be informed that this is a **preliminary cost assessment only**, based on the diagnostic findings submitted. Costs may increase considerably if there is a change in diagnosis during in-patient treatment or if the patient develops complications and/or needs intensive care and/or respiratory treatment. The receipt of your **advance payment** based on this estimate is the precondition for your in-patient admission. Included in the cost estimate is a safety margin for unexpected course of treatment (10% for preliminary cost assessments with a total amount up to EUR 100.000; 25 % for preliminary cost assessments with a total amount more than EUR 100.000). External suppliers, which do not belong to Munich Municipal Hospital Group are not included in this cost estimate, such invoices have to be settled directly with the supplier. After your treatment is completed, you will receive a final invoice stating the total costs for the treatment at Munich Municipal Hospital Group. Please note that in case of deviation between the cost estimate and the final invoice, **the costs stated in the final invoice prevail**. If the final invoice exceeds your prepayment, you are obliged to remit the debit amount; if your prepayment exceeds the final invoice, the respective credit amount will be refunded to you.
